Press Release Summary: Boots.com has announced that it is to become the exclusive UK stockist of deep wrinkle filler cream, Tri-Aktiline, introduced by Good Skin Labs

Press Release Body: **Boots.com** has announced that it is to become the exclusive UK stockist of deep wrinkle filler cream, **Tri-Aktiline**, introduced by **Good Skin Labs**.

Those looking to improve the appearance of their skin for the New Year now only need to look as far as **Boots** for **Tri-Aktiline**. This deep wrinkle formulation helps fill fine lines and wrinkles whilst firming the skin over time. The innovative concentrate helps eliminate the appearance of wrinkles, evening out and smoothing away the look of the deepest, most visible lines. It can be used wherever facial expressions have left their mark, for example crow's feet or laughter lines. **Good Skin Labs** report 68% of women who tested Tri-

Aktiline noticed an immediate filling of wrinkles, and 83% reported a significant improvement in the appearance of lines after 4 weeks use.

The core of [Tri-Aktiline](#) is an innovative combination of three ingredients, helping to firm and plump skin's appearance over time. **Gatuline Expression** is extracted from the South American **Acmella Oleraca plant**, helping to relax the look of facial tension and expression lines, like crow's feet. **Kombuchka Ph Extract**, derived from **sweet black tea**, works to plump wrinkles so that they appear smoother on the surface and **Argireline** helps boost natural collagen production for long-term visible wrinkle reduction.

Other ingredients help provide immediate smoothing capabilities. **Matte silicones** fill in creases on the skin's surface, temporarily veiling them, while **sodium hyaluronate**, **avocado oil**, **cholesterol** and **shea butter** hydrate the skin to further plump fine lines all over the face. A silky blend of optical diffusers (ultra-light spherical powders) helps eliminate the appearance of wrinkles on contact.

During clinical trials of this [wrinkle cream](#) carried out by **Good Skin Labs**, researchers observed that at the end of eight weeks there was a 45% reduction in the appearance of wrinkle depth and length, a 58% improvement in lifting and a 32% improvement in skin firmness. The cream should be applied after cleansing, directly onto wrinkles and should be allowed to set before applying other products and make-up.

Tri-Aktiline is available exclusively online at **boots.com** until the start of February and will then be made available in larger **Boots** stores.

About

Boots

Boots is a leading retailer of beauty products, [skincare products](#) and [health products](#), with thousands of products from prestigious brands, as well as exclusive lines that can't be found anywhere else, either on the high street or online.
