

The Strength and Power of Yahoo Web Hosting

Released on: January 24, 2008, 10:01 am

Press Release Author: **Russell Blanc**

Industry: [Internet & Online](#)

Press Release Summary: Building a website can be an arduous and time consuming task, especially if you don't have the right tools. There are so many web hosting companies out there that profess to make things different, but Yahoo Web Hosting really is different!

Press Release Body: **The Strength and Power of [Yahoo Web Hosting](#)**

Building a website can be an arduous and time consuming task, especially if you don't have the right tools. There are so many web hosting companies out there that profess to make things different, but that isn't always the case. As a matter of fact, it rarely is the case. [Yahoo Web Hosting](#) is different. For a small fee, you can get set up with everything that you need to get your website up and running the right way the first time. No matter what type of website you are looking to build, Yahoo web hosting has the tools that you need to make things go as easy on you as humanly possible.

Easy to Use Web Authoring Tools

One of the best things about Yahoo web hosting is that you can get your website up and running quickly. These tools aren't so generic that your site looks like everyone else's website, but they do offer design templates that make it easier to put up your site than you ever

thought possible. And **Yahoo Web Hosting** is compatible with 3rd party web authoring tools such as **DreamWeaver** or **FrontPage**.

Turn Visitors to Customers

There is no use in having a website if nobody visits it, and there is no use in having visitors if your visitors don't make money for you. **Yahoo web hosting** gives webmasters the tools that they need to be able to turn website visitors converting into paying customers.

The service gives webmasters all of the tools they need to convert traffic into customers, including a way to track the number of visitors who come to your site on a daily basis as well as the search engines that brought them there. Keyword research is a breeze with **Yahoo web hosting** as well; the keywords that were used to draw people in to your site are all at your fingertips as well as the referrer web sites. The Yahoo web hosting service definitely takes the guesswork out of being a webmaster. You can know exactly what to target and who to target without having to spend all of your time researching trends, and that is one aspect in which the service definitely pays for itself in the end.

A \$100 credit towards the Yahoo search marketing program, a \$50 credit toward the Google AdWords pay per click program and a free submission of your site into the major search engines—Yahoo and Google are all included with your subscription.

Your Options are Open

With **Yahoo web hosting**, you only have to pay for the web site hosting plan that matches your needs. Whether you need a **Yahoo Merchant site** or a **Yahoo Store account**, which offers ecommerce to the public, the Yahoo service has got you covered. This gives you the freedom to conduct your business the way you want and grow with time.

Security in the Yahoo Service

The **Yahoo web hosting** services provide more than 200 email addresses for your business and you can rest assured that they give you more storage than you will ever need. **SpamGuard** keeps those nasty spam emails away from your business so that you and your employees can stay focused on work and not have to worry about computer security and spam. You can get access to **Norton Antivirus**

as an extra measure of protection as well, so any malware that gets through is immediately taken care of.

Support When You Need it Most

We all need a little bit of help sometimes, and Yahoo's hosting service gives you all of the support that you need, 24 hours a day, 7 days a week. With personal service and prompt attention, what more could you ask for in support?

Yahoo web hosting is where it's at in the world of web hosting. For small businesses with big aspirations, there are few services better than this.
