Industry: [Retail](#)

Chesterfield, Missouri, - 9, March, 2008 - Guard Yourself today announced the opening of it's website, providing self defense products including industry leading brands such as Taser, Mace, Stun Master, Wildfire, Pepper Shot, Talon and Z-Force. This Project is devoted to providing the tools and information needed for personal safety. Guardyourself.net includes safety tips, instructional videos and laws pertaining to the use of personal defense products.

"Crime is on the rise! The statistics speak for themselves" Said Jake Buhrman, owner and operator of Guard Yourself. "Unfortunately many people rarely consider the danger until they are in a true life threatening situation. By then it's too late, they freeze in fear and fall victim to their attacker."

The growing economic crisis has put a strain on society and the worst is yet to come. In today's increasingly violent times, every citizen is responsible for ensuring their own personal safety and security. Statistics have always shown that people who fight back during a life-threatening situation substantially increase their chances of escaping and avoiding harm to themselves or loved ones.

ABOUT Guard Yourself - The site offers training videos for individuals who don't have the time to attend self defense or martial arts classes. It also contains tips and information about choosing the right personal protection products for each unique situation.

www.guardyourself.net has a wide range of products for personal protection ranging from [pepper sprays](#) and personal alarms to [stun guns](#) and Tasers (including the new C2 [Taser](#)).
