

Easyspace launch low cost shopping cart products

Released on: April 23, 2009, 4:32 am

Author: [Easyspace Web Hosting](#)

Industry: [Internet & Online](#)

Easyspace, one the largest [web hosting](#) providers in the UK, has this week added a new range of low cost, feature rich, shopping cart solutions to its product portfolio.

With the ability to accept payments via a number of the most popular methods already built in (including Paypal and Worldpay), as well as exporting options allowing you to easily list your products on sites such as ebay, Google Base and Kelkoo as well as on your own site, the new eCommerce solution from Easyspace offers an intuitive way for users to start or improve their business online.

Easyspace already provides solutions for all other aspects of setting up a business online, from simple [domain registration](#) and a variety of hosting options, through to security and dedicated website design. The new Online Shop products, starting at just £14.99 per month, provide customers the final step in the process.

"We've offered off the shelf eCommerce solutions in the past," states Errol Vanderhorst, Sales and Marketing Director for Easyspace, "but in all honesty, the high price associated with them in relation to the price of our other services, meant that they weren't a natural fit or upgrade option for the customer. Our new Online Shopping packages have been developed specifically with the customer and our general pricing in mind, meaning the customer can now add a shopping cart with an extensive range of features for a low monthly cost."

The Shopping Cart range from Easyspace is delivered in 3 packages - Starter, Business and Pro – ranging from £14.99 per month through to £44.99 per month depending on requirements. Features included a selection of payment gateway options, marketing gateway options, import / export / discounting options, several security options and more.
