

# Fasthosts Unveils All New Dedicated Servers

Released on: January 15, 2010, 7:09 am

Author: [Fasthosts](#)

Industry: [Internet & Online](#)

Fasthosts Internet Ltd, a leading web hosting provider, debuts its new range of high-performance dedicated servers for IT professionals.

The new [Fasthosts](#) dedicated servers feature the latest Intel Xeon quad core processors, 100Mbps connection and Fasthosts' unlimited bandwidth. Deployed in minutes and available in either Linux or Microsoft operating systems, the servers provide a reliable, secure and highly flexible server platform. Fasthosts' robust network and unlimited data transfer can further benefit individuals and enterprises that generate or process large volumes of data.

[Dedicated servers](#) represent a cost effective and reliable solution for hosting core IT infrastructure such as websites or business application software. They provide a secure and private environment for the user's

applications to be operated and data to be stored. Business users can enjoy the full power of the hardware and guaranteed access to [bandwidth](#), and retain complete hands on (KVM) remote control of their server at all times.

The latest Fasthosts Dedicated Server packages provide IT professionals and businesses with reliable server operations without the capital expenditure investment in the servers or in the physical space associated with running hardware on their premises 24/7. The latest-spec Intel processor in Fasthosts servers delivers powerful, energy-efficient performance so users can run several intensive programs at once without slowing down. Each server is maintained with the latest operating system updates to maximise efficiency and security.

Fasthosts' brand new range of Dedicated Server packages comprises the [DS300](#) (Dual Core & 2GB RAM), DS500 (Dual Core & 4GB RAM), the DS700 (Quad Core & 8GB RAM), DS900X (Xeon Quad Core & 8GB RAM), and the DS1000XX (2x Xeon Quad Core & 16GB RAM). Servers are available in either Linux or Windows configurations and feature full admin control as well as Fasthosts' unlimited bandwidth and 100Mbps high-speed virtual data pipe. Businesses are assured that Fasthosts guarantees 99.9% server uptime. Technical support is provided 24/7 from UK by email or online.

Steve Holford, CMO Fasthosts Internet Ltd., said "We have upgraded and invested in our Dedicated Server range to ensure unbeatable service delivery and excellent ROI for business users. In an increasingly digital economy, success often begins with a robust and reliable server access that you have confidence will be working for you round the clock, day in day out, with all the benefits, but none of the high costs of running it as an internal operation".

Fasthosts offer a range of powerful control panels enabling the user to set up websites and applications quickly and easily, meaning more time to focus on running their business. The award-winning [Plesk 9 control panel](#) interface provides ultra-intuitive server maintenance and control.
