[Malibu, CA] - Sunset Malibu, an exclusive drug addiction treatment center on the California coast, has long been a transformational force in the field of rehabilitation and recovery. Now, Sunset is announcing its redoubled efforts in providing clients with continuing support through the long-term healing process.

Drug addiction recovery doesn't end on the final day of a primary rehab program. On the contrary, drug addiction is a resilient disease, and [drug addiction](#) recovery can only succeed by virtue of resilient effort. The best drug addiction treatment program is one which help patients develop the strength they need to stay sober over the long run. In the end, there's no other way to promote meaningful and lasting wellness.

Those considerations, in turn, are at the heart of Sunset Malibu's treatment philosophy.

With its world-class caregivers and elegant accommodations, Sunset Malibu is an unparalleled recovery destination. The center has always catered to upscale clients from every corner of the globe. Now Sunset is renewing its commitment to its core values, with the goal of delivering life-changing and long-term care to individuals who seek it. At Sunset Malibu, the client always comes first.

"Drug addiction recovery isn't really recovery if it doesn't last," said Sunset Malibu's Clinical Director. "We give our clients the support they need to get better forever, with everything from life-skills training to sober living programs. That, we believe, is why so many of our graduates are still healthy years after leaving the center. "

Unfortunately, that passion for long-term service is precisely what sets Sunset apart from its competitors.

It's one thing for an alcohol and opiate treatment center to pay lip service to the importance of sober living and aftercare programs. It's quite another thing for that facility to devote adequate resources to the long-term healing process. The truth is that many of the most well-known drug addiction facilities in Los Angeles essentially abandon their clients at the end of primary drug rehab. As should go without saying, these institutions can't be trusted to produce lasting results.

Under the circumstances, argues Sunset Malibu's Clinical Director, those shortcomings are inexcusable.

"Our clients come to us because they want to get better forever," the Clinical Team said. "It's our role as a drug addiction treatment center to help them do exactly that. Any institution that isn't committed to the long-term well-being of its patients doesn't deserve to be in business."

Drug addiction is a crushing disease. The good news here is that drug addiction rehabilitation can make a world of difference. The expert caregivers at Sunset Malibu have proven themselves capable of helping clients heal from the inside-out. As the center's successful graduates have learned firsthand, no outcome could ever possibly be more important.
