Industry: [Healthcare](#)

Most drug rehabilitation facilities treat cocaine addiction using the same traditional approach, typically through 12-step programs or drug therapy. Vista Bay Drug Rehab is different, employing an individualized, all natural, holistic program that has led to a remarkable success rate in helping people recover from the ravages of cocaine addiction. While other clinics frequently see repeat patients, Vista Bay offers clients an additional 30 days of treatment should they relapse within six months. In recognition of the work it does in helping victims to overcome cocaine addiction, Congress granted the Congressional Certificate of Special Recognition to Narconon, the organization that operates Vista Bay Rehab.

February, 2010 - Video footage posted on YouTube offers the public a rare glimpse at Narconon Vista Bay Rehab, a drug and alcohol treatment center that's renowned worldwide for its holistic cocaine addiction recovery program. Vista Bay Drug Rehab is not the sort of facility that's in the spotlight, despite the fact that Narconon has built a reputation for highly effective holistic treatment programs for over 40 years. While the facility is highly regarded (with recognition that extends to being awarded a Congressional Certificate), the staff is content to let the center's success in helping patients finally overcome their addictions speak for itself.

Brandon (his last name is withheld to protect his identity), a 22 year old who fought addictions to cocaine, marijuana and alcohol, is a

typical success story. After years of substance abuse, doctors told him he had suffered permanent nerve damage. He was literally throwing his life away. He enrolled at [vistabay](#), hoping to turn his life around, and after graduation wrote:

"I have been clean now for five months, and I will continue on this track for the rest of my life... I feel blessed that the Narconon program saved my life and I have learned to live life, instead of letting my environment (sic) have a negative effect on me."

There have been thousands of other patients like Brandon. Watching the video on YouTube, where a graduate of the program recounts everything he's gained since completing treatment, including reaching the stage where he's able to set and achieve goals in his life, is poignant and helps to put a human face on why Narconon expends so much effort in helping people overcome addictions.

Vista Bay Drug Rehab Center is different from most other drug rehab clinics. The patient is the priority and the treatment program for each patient is customized to meet their individual needs. An all natural, holistic approach to cocaine addiction is employed, rather than the clinical treatment that most centers rely on and the success rate of Vista Bay Rehab supports the idea that holistic treatment is a superior method.

Narconon has offered drug addiction rehabilitation for over 40 years and the cocaine addiction program at [Vista Bay Rehab](#) continues to gain recognition for its success rate. Even though 30 days of additional treatment are offered should a patient suffer a relapse within six months of graduating from the program, the staff is seldom called upon to make good on this promise. Based in California, with a beautiful and well equipped facility (which can be seen on the YouTube [video](#)), [Vista Bay Drug Rehab](#) is truly a permanent solution to cocaine addiction and other substance abuse issues.
